## ABOUT OUR PARTNERSHIP

EV Range is a proud partner of LG Business Solutions bringing commercial grade 48A Level 2 chargers to the US market.

LG has certified EV Range as its first electric vehicle charging network provider nationwide, as a result of its proven expertise in EV chargers, software, and payment systems across all industries.

EV Range provides a best-in-class charging experience from the EV driver to the station owner and to the reseller. Our plug-and-play products connected to the EV Range platform bring a complete managed solution that includes reporting, key performance indicators, and in house 24-7 support. This solution not only drives revenue, but delivers a hassle-free amenity to the charging station operator.

## SIMPLIFIED SALES AND LOGISTICS

Products are preconfigured with an internet connectivity gateway and programmed to immediately connect to the EV Range Network for simple plug and play deployments. Install, turn on, sign-up and start charging EVs all in the same day.

- ✓ Volume discounts available. No volume commitment.
- ✓ No exclusivity requirements.
- ✓ Work with a charging experience focused network that organically generates new/repeat customers.
- ✓ End customers obtain a reporting dashboard and ability to generate revenue from charging utilization.
